## PVC SPACER

PVC Tile Spacer

### PVC SPACERS

Ensure perfect alignment and uniform gaps between tiles with our high-quality spacers.

### OVERVIEW

**PVC SPACERS** are meticulously designed to deliver consistent spacing between tiles, enabling precise alignment throughout your tiling work. Whether you're working on walls or floors, these spacers help you achieve a professional-grade finish, especially when paired with the right grout. Available in a wide range of sizes from 2 mm to 10 mm, they offer versatility for various tile types and patterns.

### FEATURES & BENEFITS

- **PRECISION ALIGNMENT**  
Expertly crafted to ensure consistent spacing between tiles for flawless alignment.
- **REDUCES GROUT CONSUMPTION**  
Helps control and reduce grout usage by maintaining uniform joint gaps
- **PROFESSIONAL FINISH**  
Creates neat, evenly spaced tile layouts for a clean, professional appearance.
- **VERSATILITY**  
Compatible with a wide range of tile types, formats, and installation patterns.

### PRODUCT DETAILS

Available Sizes: 2 mm, 3 mm, 4 mm, 5 mm, 6 mm, 8 mm, and 10 mm

**QUANTITY PER PACK:** 100 Pieces

### WHY CHOOSE PVC SPACERS

- **ACCURATE TILE SPACING:** Delivers consistent and reliable joint widths for flawless alignment.
- **DURABLE PVC MATERIAL:** Made from high-quality plastic that won't easily deform or break during use.

- **TIME-SAVING:** Simplifies the tile-laying process, reducing rework and increasing installation speed.
- **MULTIPLE SIZES:** Available in various thicknesses to meet the needs of any tile design or pattern.
- **INSTALLER APPROVED:** Trusted by professionals for its performance, ease of use, and clean finish.
